9516	3.5	.00048 Mil Polyester	2.25	LSE
9517	4	1 Mil Polyester	2.0	LSE

## Unique Thermoplastic

Designed to be resistant to blocking, so it needs no release liner. NECAL 5130 has the unique capability of bonding to a wide variety of substrates, including glass, wood, aluminum, steel, brass, various cloths and leathers, and most plastics (ABS, styrene, nylon, polyethylene, and polypropylene). In addition, NECAL 5130 has excellent resistance to water, oil, gas, and most detergents and has excellent low-temperature properties.

5130

## Mission

*We provide innovative coating solutions and services by empowering people to passionately collaborate through relationships as permanent as our adhesives!*

NECAL produces and sells quality adhesive products with our suppliers and employees. We are committed to working and learning as a team, continually improving our business processes, and providing customer service excellence. By doing so, we aim to grow our presence in the marketplace and preserve a legacy for future generations.
